2025 Tsinghua Summer School for International Construction

Department of Construction Management, Tsinghua University

◆ Program Description

- The 2025 Tsinghua Summer School for International Construction will leverage Tsinghua's global influence in construction management, gather high-quality teaching resources from both domestic and international institutions, broaden the international perspective of students in the field of international engineering, and provide opportunities for students to understand China and its engineering industry.
- The duration of the Summer School is 14 days. During these 14 days, students will engage in various forms of learning activities such as lectures, seminars, and case discussions to learn and experience cutting-edge knowledge and technology in the fields of construction, engineering, and management.

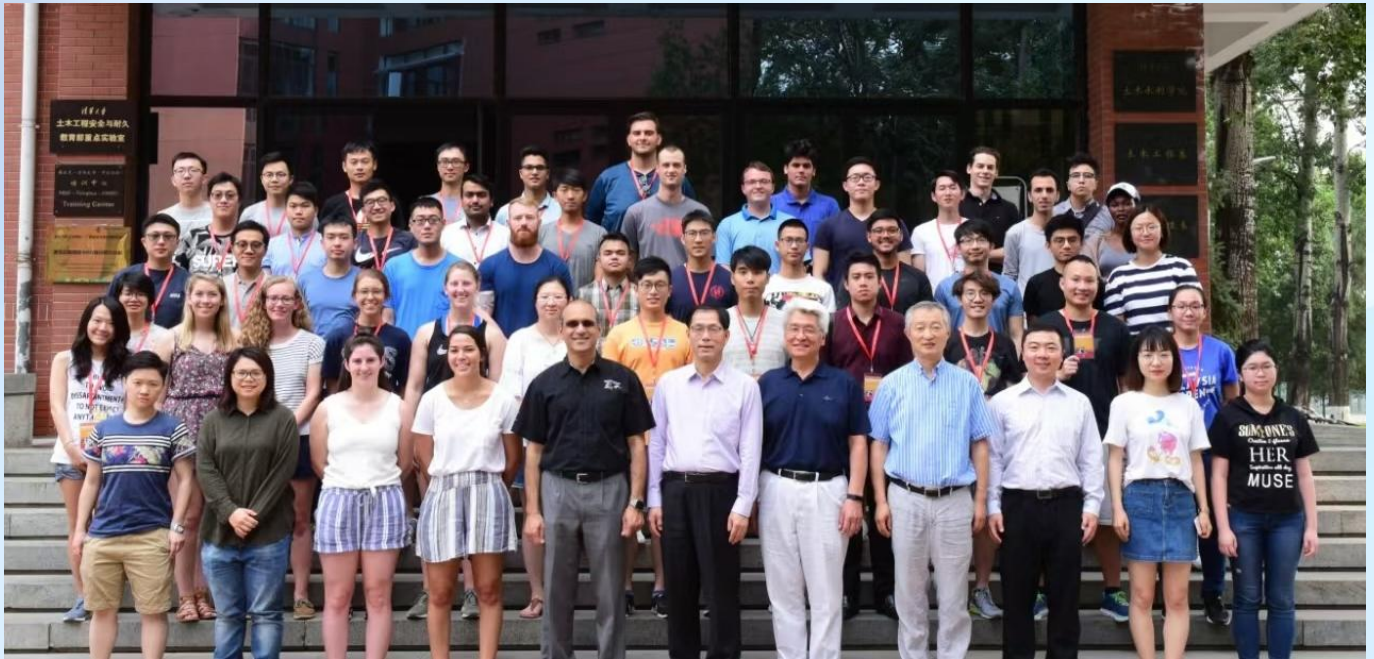

Also, in the summer school, students will deepen their understanding of China, Beijing, and Tsinghua University. Since its establishment in 2007, the Summer School has consistently received high praise from students. Participants are from various countries around the world, including the United States, the United Kingdom, South Korea, Australia, Mongolia, Afghanistan, Malaysia, Sri Lanka, Singapore, Mainland China, etc.

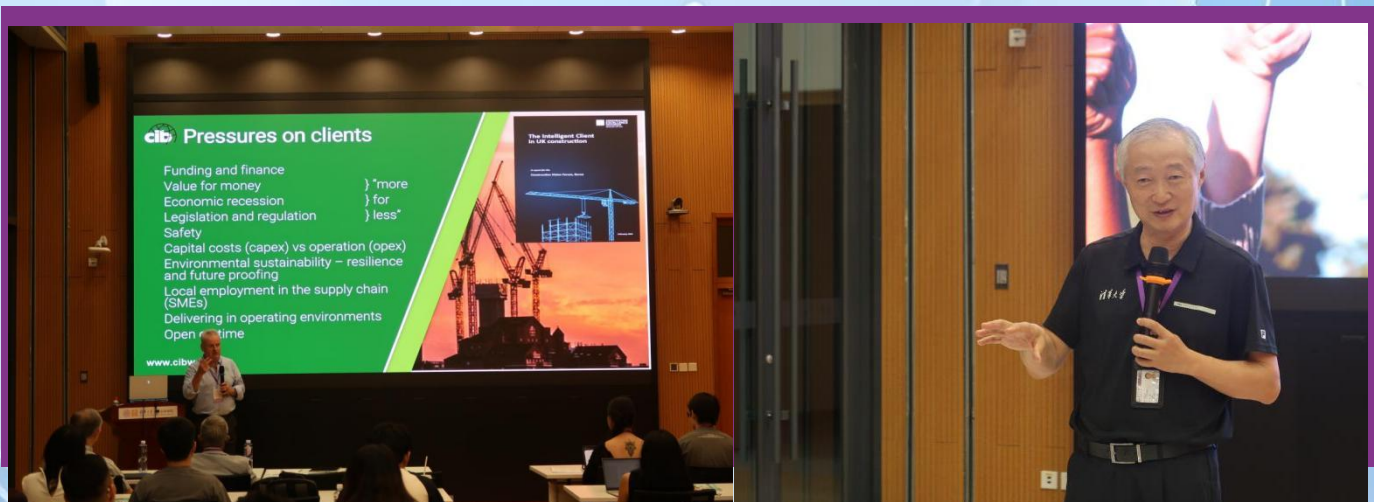

◆ Who Could Attend

Hosted by Tsinghua University, the Tsinghua Summer School for International Construction is open to professionals in computer science, architecture, and related fields, as well as undergraduate and graduate students in disciplines such as artificial intelligence, information technology, engineering, and architecture from around the world. Participants from different countries and schools can gain rich learning experiences in the program and benefit from international academic exchanges.

◆ Curriculum and Teaching Arrangements

The curriculum of the Tsinghua Summer School for International Construction fully utilizes the resources of top experts and scholars both domestically and internationally, providing students with comprehensive and in-depth learning content. In addition to professional courses, the school also arranges case analysis sessions, seminars, and field trips, allowing students to integrate theoretical knowledge with practical experience. Through these rich learning content and activity arrangements, students will not only acquire professional knowledge but also expand their international perspectives, enhance their teamwork skills, and improve their language expression abilities.

◆ Start and Finish Dates

June 23, 2025 - July 6, 2025

Duration: 14 days

◆ Price

¥8000 RMB, including registration fee, training fee, dormitory, and meal

◆ How to Register

Please register through the official website of the summer school at <http://www.icpm.civil.tsinghua.edu.cn/summerschool/suration/index.htm> and fill in the relevant information on the registration form.
